

SAHANA SHREE.U.P

Chennai ,Tamil Nadu | 8248189032 | sahanashreee26@gmail.com | [Portfolio](#) | [Linkedin](#)

PROFESSIONAL SUMMARY

Detail-oriented Information Technology student with an **8.6 CGPA** and hands-on experience in **Python software development**, **Object-Oriented Programming (OOP)** and **machine learning**. Proven ability to bridge the gap between backend logic and user experience while managing cross-functional projects. Strong communicator skilled in product advocacy, technical documentation and writing clean, maintainable code.

TECHNICAL SKILLS

Languages: Python, JavaScript, PHP, HTML5, CSS3, TypeScript.

Frameworks & Libraries: React , Next.js , Node.js, Express.js, Flask , Tailwind CSS.

Software Engineering: Object-Oriented Programming (OOP) , REST API Development , Data Structures & Algorithms (DSA), JWT Authentication, Role-Based Access Control (RBAC)

Databases & Tools: MySQL , PostgreSQL (Neon), Git , GitHub , Docker , Streamlit , Figma , Vercel, Render.

Soft Skills: Technical Outreach, Conflict Resolution, Cross-functional Communication.

TECHNICAL PROJECTS

AI-Based Fraud Detection System | Developer

- Constructed a real-time predictive model using **Random Forest** and **Streamlit** to identify fraudulent transaction.
- Programmed a "Smart Freeze" security protocol to automate risk mitigation and trigger instant alerts.
- Performed advanced feature engineering on large datasets to optimize model precision and recall.

File Upload Portal (Google Drive Inspired) | Full-Stack Developer | [GitHub](#) | [Live Demo](#)

- Developed a secure full-stack file management platform using React.js, Node.js, Express.js, and PostgreSQL featuring JWT-based role authentication (Admin/User) and folder organization.
- Engineered protected RESTful APIs with backend authorization checks to prevent unauthorized access, integrating upload progress tracking and cloud deployment via Render and Vercel.

AI Spend Optimization Dashboard | Frontend-Focused Full Stack Developer | [Live Demo](#)

- Built and deployed a SaaS-style AI spend optimization dashboard using **Next.js**, **React**, **TypeScript** and **Tailwind CSS** to analyze AI tool subscription costs and generate dynamic savings recommendations.
- Created reusable frontend components, interactive analytics visualizations, downloadable audit reports and responsive UI systems, deployed the application on Vercel with GitHub-based CI workflow.

PROFESSIONAL EXPERIENCE

Web Developer Intern | Auro Creative Studio

June 2026 –Present

- Full-stack developer responsible for architecting and deploying secure, enterprise-grade web applications using React.js, Node.js, Express.js, and PostgreSQL, integrating robust JWT role-based access control and strict server-side validation layers across company projects.

Community Manager Intern | Velocity Global Solutions Private Ltd.

April 2026

- Ex Secured a high-performance role earning a ₹10,000 stipend to execute targeted communication strategies, educating 300+ users on product utility, streamlining feedback, and driving a 15% increase in conversion rates for digital tools.

DevOps Intern | Bics Global

July 2025 – August 2025

- Orchestrated containerization strategies and workflow version control using Docker and Git, reducing system environment setup times by 40% and cutting codebase integration conflicts by 25%.

UI/UX Developer Intern | RootPro Technologies

December 2025-January 2026

- Architected a responsive education platform using Figma and Tailwind CSS while engineering UI components integrated with PHP backend systems, boosting delivery speeds by 20% and engagement by 25%.

EDUCATION & CERTIFICATIONS

Bachelor of Technology (IT) | Jeppiaar Engineering College | **CGPA: 8.6**

Certification: Python for Data Science – NPTEL (2025)
